BWP - R290 - 20

„Aquaheater 185L“

The Aquaheater BWP - R290 - 20 is an excellent energy-saving solution for domestic hot water production in buildings.

A domestic hot water heat pump allows for the separate use of heating systems and offers a free cooling and dehumidification option.

By extracting energy from the ambient air, the efficiency of the heat pump can be 3 to 5 times higher compared to conventional systems.

Features:

» Environmentally friendly refrigerant R290 (150g)
» Energy savings of up to 75%
» Intelligent LCD control
» High-quality components with warranty
» Pleasantly quiet operation
» Indoor installation

Performance Data:

Ambient temperature	3°C - 40°C
Water temperature	15°C - 55°C
Nominal power	1.5kW (+1.5kW electric heater)
Max. water temperature	65°C with eletric heater
Noise level	51 dB
Dimensions	Ø 560 mm, H 1745 mm
Connection size	Ø 180 mm
Water connection	12“
Charging time for 10 kWh of hot water usage	6h
